DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-16 and 30-33, drawn to annuloplasty bands, classified in class623, subclass 2.36.
 - II. Claims 17-20, drawn to method of repairing heart valve, classified in class128, subclass 898.
 - III. Claims 21-26, drawn to combination annuloplasty band and holder, classified in class 623, subclass 2.11.
 - IV. Claims 27-29, drawn to holders for annuloplasty bands, classified in class606, subclass 139.
 - V. Claims 34-36, drawn to sizers for valve annulus, classified in class 606, subclass 148.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and IV and V are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as supporting a valve annulus, invention IV has separate utility such as holding a band, and invention V has separate utility such as measuring diameter of an annulus. See MPEP § 806.05(d).

Application/Control Number: 09/982,299

Art Unit: 3738

- 3. Inventions III and V are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention V has separate utility such as measuring diameter of an annulus. See MPEP § 806.05(d).
- 4. Inventions III and I or IV are related as combination and subcombination.

 Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination lacks the required trailing segment of the subcombination. The subcombinations have separate utility such as supporting damaged valves (I) or measuring diameter of annulus (IV).
- 5. Inventions I or III or IV or V and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process as claimed could be used with materially different products such as heart valves delivered by a catheter wherein the size is determined by non-invasive tools such as x-ray.

Art Unit: 3738

6. Because these inventions are distinct for the reasons given above and have

acquired a separate status in the art as shown by their different classification, restriction

Page 4

for examination purposes as indicated is proper.

7. This application contains claims directed to the following patentably distinct

species of the claimed invention:

Species of Annuloplasty Bands

A. Figure 1

B. Figure 25

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for

prosecution on the merits to which the claims shall be restricted if no generic claim is

finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification

of the species that is elected consonant with this requirement, and a listing of all claims

readable thereon, including any claims subsequently added. An argument that a claim

is allowable or that all claims are generic is considered nonresponsive unless

accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration

of claims to additional species which are written in dependent form or otherwise include

all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

are added after the election, applicant must indicate which are readable upon the

elected species. MPEP § 809.02(a).

Art Unit: 3738

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

8. A telephone call was made to Tim Czaja on December 11, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

9. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William H. Matthews (Howie) whose telephone number is 703-305-0316. The examiner can normally be reached on Mon-Fri 7:00-4:30 (Every other Friday off).

Art Unit: 3738

Page 6

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Corrine M. McDermott can be reached on 703-308-2111. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 308-2708 for regular communications and (703) 305-3590 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0858.
